

## The Digital Banker - Global BankTech Awards 2023 - Evaluation Criteria

### ALL AWARD CATEGORIES

#### Belief statement

We believe that vendors and technology service providers are instrumental in helping financial institutions drive digital transformation, mitigate risk and enhance operational processes. Effective vendors can help financial institutions enhance their existing technology stacks through solution delivery and execution, platform and infrastructure development as well as expert advice on the application of emerging technologies. For this stream, we look at the ability of vendors to correctly assess the technical challenges faced by the bank, the execution of a particular technology solution to improve operations and workflows while helping the financial institution materially scale.
